

## Integration of Revhunter with Magento2

1. Read the documentation for the plug-in  
<https://packagist.org/packages/revhunter/magento2>
2. Install using Composer  
(Note: these steps are necessary only during the first software installation)  
`composer require revhunter/magento2`
3. Open command line
4. Go to the main Magento2 directory and type in the following commands:
5. Activate module:  
`php bin/magento module:enable Fwc_RevHunter`
6. Update Magento extensions:  
`php bin/magento setup:upgrade`
7. Recompile Magento files:  
`php bin/magento setup:di:compile`
8. Redeploy static content:  
`php bin/magento setup:static-content:deploy -f`
9. Clean the Magento cache:  
`php bin/magento cache:clean`

NOTE: If errors appear after installation, use the following uninstall command:

```
php bin/magento module:uninstall Fwc_RevHunter
```

10. Log in to your Magento administration panel
11. Go to Store → Configuration
12. Generate the Revhunter ID with the button below, copy it, then paste in the  
Magento panel
13. Save changes
14. Go to Cache Management and refresh the cache
15. Add the Product Feed link below and save changes

**That is all!**

From now on you will be able to activate dynamic campaigns based on products from your store!
