

# Integration of Revhunter with OpenCart

To install the Revhunter extension in an OpenCart store:

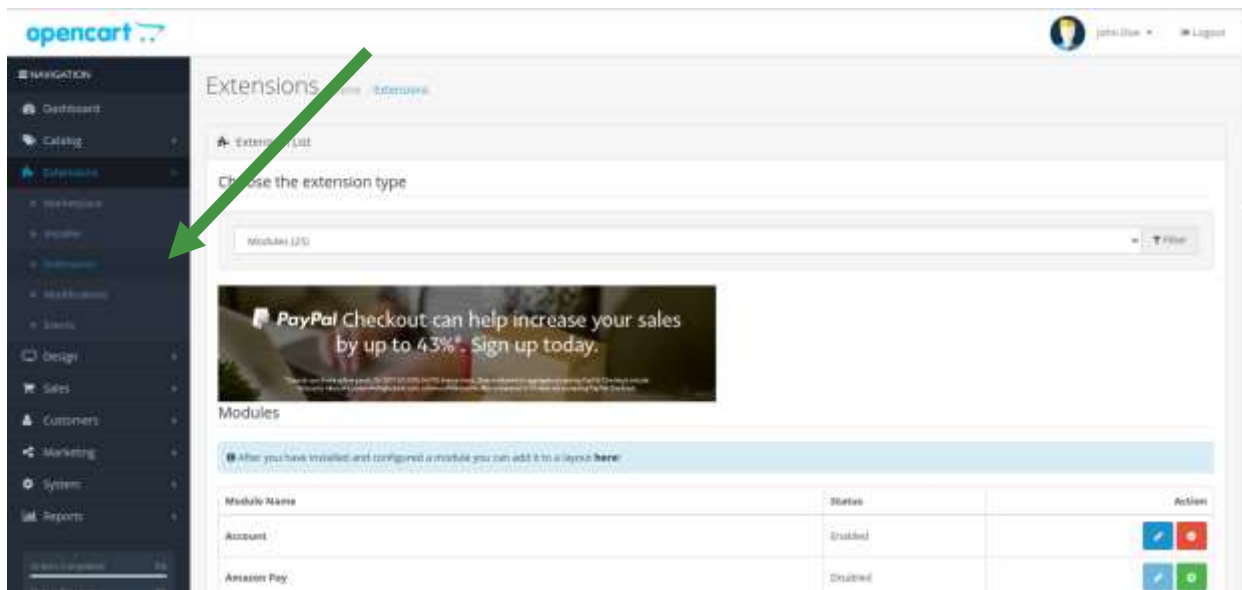

1. Go to the Extensions → Installer tab

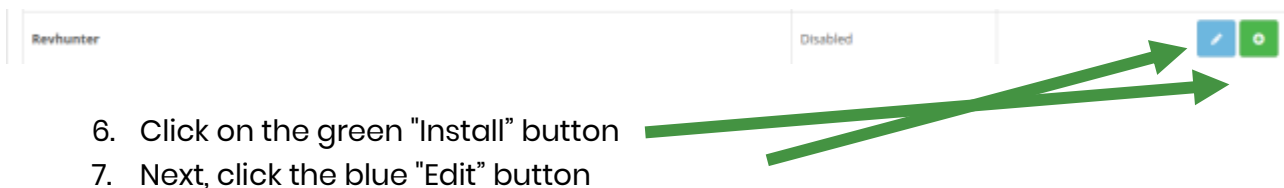

2. Click upload and choose the *revhunter.ocmod.zip* file previously downloaded from the Revhunter panel
3. After a successful upload of the extension you will see a screen similar to this:

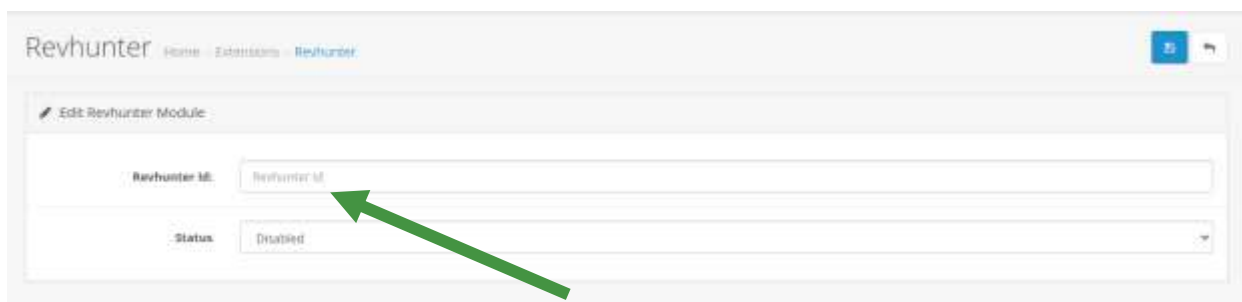

- Go to the Extensions → Extensions tab. From the dropdown list choose "Modules"

- Find the Revhunter extension on the list:

- Click on the green "Install" button
- Next, click the blue "Edit" button

- Type in the account ID generated in Revhunter in the form, set the status to "enabled" and click on the blue "Save" button
- If you do not yet have a product Feed, also download the Feed plugin. The Feed is necessary to implement dynamic campaigns. Go to Extensions > Marketplace and find the appropriate plugin (e.g., "Product Feed - idealo", or "OpenCart Google Feed", or any other which will generate a product feed URL for you)

10. Install the plugin and enable it, then download the product feed URL, paste it to your integration panel in Revhunter and save the changes

**That is all!**

From now on you will be able to activate dynamic campaigns based on products from your store!
