

Integration of Revhunter with WooCommerce

1. Log in to the Wordpress panel and go to the Plugins → Add new tab
2. Find and install the Revhunter plugin from the list of available plugins or download it from the Revhunter panel, then upload it using the "Send plugin to server " button
3. If you do not yet have a product Feed, also download the Feed plugin. The Feed is necessary to implement dynamic campaigns. (The Product Feed PRO plugin for WooCommerce which we recommend is not a required plugin. Use a different one if you have it)
4. Copy your Revhunter ID and upload it to the Revhunter plugin in the Wordpress panel

5. Enable the feed plugin.
6. In the case of Product Feed PRO for WooCommerce go to Product Feed PRO > Create Feed.
7. Create the feed, with the Google Shopping, XML, Daily format
8. W kroku "Field Mapping" zaznacz wszystkie parametry, ustal PLN jako wartość dla "price" i kliknij "Save"
9. In the "Field Mapping" step, highlight all parameters, set PLN as the value for "price" and click on "Save"
10. Next, click "Save mappings", "Continue", and finally "Generate Product Feed"
