

## Integration of Revhunter with IdoSellShop

1. Log in to the administration panel in the IdoSell system

2. From the menu, choose “Marketing and integrations”,

then “Marketing automation” and “Revhunter”

3. You will see the integration with Revhunter page. Accept the terms and conditions and initiate integration!

**That is all!**

The system will automatically generate the required product feed and transfer it to your account in Revhunter. If you do not have one, it will create it, and you will receive an email about it.

All the required tracking codes for static and dynamic retargeting activity will be implemented automatically. You can be sure that everything will be prepared accordingly to your activities.
